

# Errors

Error responses for 400 series errors (e.g. 400, 401, 403, ...) are returned as a JSON object with two attributes `message` and `status` (HTTP status code), and possibly an attribute `errors` with a list of more detailed errors.

```
{
  "message": "Deposition not found",
  "status": 404
}
```

For more complex errors, we include the attribute `errors`, a JSON array of objects, each with the attributes `message` (with a human-readable explanation of the error), and possibly `field` (with the "path" to field that contains the error).

Example of an error message with detailed errors:

```
{
  "message": "Validation error",
  "status": 400,
  "errors": [
    {
      "field": "metadata.access_right",
      "message": "Not a valid choice"
    },
    {
      "field": "metadata.creators.0.name",
      "message": "Name is required."
    },
    {
      "field": "non_existent",
      "message": "Unknown field name."
    }
  ]
}
```

## Depositions

REPRESENTATION

The Deposition resource is used for uploading and editing records on Zenodo.

DEPOSIT

| Field                                     | Description                                                                                                                                                                                                       |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <code>created</code><br><i>timestamp</i>  | Creation time of deposition (in ISO8601 format).                                                                                                                                                                  |
| <code>doi</code><br><i>string</i>         | Digital Object Identifier (DOI). When you publish your deposition, we register a DOI in DataCite for your upload, unless you manually provided us with one. This field is only present for published depositions. |
| <code>doi_url</code><br><i>url</i>        | Persistent link to your published deposition. This field is only present for published depositions.                                                                                                               |
| <code>files</code><br><i>array</i>        | A list of deposition files resources.                                                                                                                                                                             |
| <code>id</code><br><i>integer</i>         | Deposition identifier                                                                                                                                                                                             |
| <code>metadata</code><br><i>object</i>    | A deposition metadata resource                                                                                                                                                                                    |
| <code>modified</code><br><i>timestamp</i> | Last modification time of deposition (in ISO8601 format).                                                                                                                                                         |

| Field                                          | Description                                                                                                                                                                                                                                                                                                                  |
|------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <code>owner</code><br><code>integer</code>     | User identifier of the owner of the deposition.                                                                                                                                                                                                                                                                              |
| <code>record_id</code><br><code>integer</code> | Record identifier. This field is only present for published depositions.                                                                                                                                                                                                                                                     |
| <code>record_url</code><br><code>url</code>    | URL to public version of record for this deposition. This field is only present for published depositions.                                                                                                                                                                                                                   |
| <code>state</code><br><code>string</code>      | One of the values:<br>* <code>inprogress</code> : Deposition metadata can be updated. If deposition is also unsubmitted (see <code>submitted</code> ) files can be updated as well.<br>* <code>done</code> : Deposition has been published.<br>* <code>error</code> : Deposition is in an error state - contact our support. |
| <code>submitted</code><br><code>bool</code>    | True if the deposition has been published, False otherwise.                                                                                                                                                                                                                                                                  |
| <code>title</code><br><code>string</code>      | Title of deposition (automatically set from <code>metadata</code> ). Defaults to empty string.                                                                                                                                                                                                                               |
